Modular hand dryer

Small but very powerful, this compact hand-dryer fits most washrooms, yet offers the power and performance of a larger model. Double-insulated (class II enclosure) design means it's 100% safe for washroom use, and this dryer is also fully CE approved and manufactured under ISO9001:2000.

Despite its high power, this model is as economical to run as other small dryers.

Installation notes: Always use a qualified electrician to install. Ideally situate between the washbasin and the exit. Fitting between washbasins, next to urinals, lavatories or showers is not recommended.

- Slim and compact, but as powerful as a larger model
- Offers the low running costs and space advantages of a small dryer
- 100% safe for washroom use

Busy hotels may consider installing this hand dryer in washrooms along with the Modular hand towel dispenser. Using the two in tandem can be beneficial. In addition, should the hand towels run out, then the hand dryer is available as a back-up.

power	220-240V AC, 50/60Hz, 4.8A, 1100W
