Modular industrial soap

If you need a hard-wearing, multi-hygiene-product dispenser for warehouses, factories and other industrial settings then look no further. This giant 2-litre-capacity item dispenses extreme industrial products, and is designed for use with high-tech pumps that distribute anything from thick barrier creams to liquid soap.

Choose our 'Standard' model for thick or beaded products, 'Extreme Industrial' for solvent-based products, or 'Pumice Industrial' for abrasive pumice.

Accepts disposable pouch, or choose a refillable reservoir with inclusive 'follower plate' to ensure clean and total dispensing of thick products.

- Suits a large range of industrial products, including pumice and solvent-based
- Specifically built for hard-working industrial settings
- Giant 2-litre capacity reduces refilling labour

Subject to quantity, exclusivity of the pouch fitting will enable you to lock-out the competition.
